

Let's Talk Science **STEM Careers Initiative**

CANNEXUS20

National Career Development Conference

January 27 – 29, 2020

Ottawa, ON

Craig White

Why we do what we do

- Science and technology are reshaping our world
- ✓Enhanced scientific literacy and critical skills/competencies are required to prepare Canadian youth for future jobs and global citizenship demands

Our Mission:

To help children and youth fulfill their potential, prepare for their future careers, and become engaged citizens in a rapidly changing world by supporting their learning and engagement through STEM.

STEM

is everywhere in modern life and is **transforming** the nature of the **workplace**.

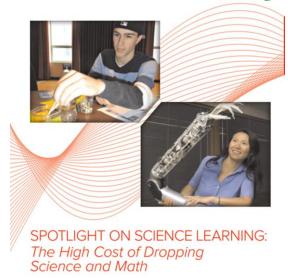

...preparing youth for their future careers.

Staying in STEM Why should you care?

- Financial
- Opportunity
- Societal

Students who opt-out of STEM face challenges:

Getting into post-secondary

Landing a first job

Growing their career

STEM graduates:

- enjoy 26% higher earnings
- experience fewer career interruptions
- have shorter employment gaps

without Grade 12 math and/or science courses,

doors close to half of university and college paths.

A high-performing economy relies on innovative people

70% of Canada's **top jobs** require STEM education

...including skilled-trades.

SPOTLIGHT ON SCIENCE LEARNING: The High Cost of Dropping Science and Math

Jobs that surprisingly require STEM

CHEF

INDUSTRIAL DESIGNER

EARLY CHILDHOOD EDUCATOR

ACTOR

Top starting STEM salaries

DOCTOR

DENTIST

PETROLEUM ENGINEER

DATA SECURITY ANALYST

WEBSITE DEVELOPER

Canada's top jobs

OIL & GAS DRILLING SUPERVISOR

HEAD NURSE & HEALTH CARE MANAGER

PETROLEUM ENGINEER

ELECTRICAL & TELECOMMUNICATIONS CONTRACTOR

CHEMICAL ENGINEER

In the next decade, over a million **skilled workers** will be needed in Canada...

...and skilled-trades increasingly require strong STEM expertise.

SPOTLIGHT ON SCIENCE LEARNING: The High Cost of Dropping Science and Math

Barriers to Youth Engagement

The OECD Global Science Forum (2006) identified barriers to youth engagement in science and technology

- Lack of subject expertise
- Curriculum appearing irrelevant
- (Negative) image of science and scientists
- Lack of awareness of careers
- Lack of role models

About me

I was born/grew up in: Mount Pleasant, Ontario Canada.

I now live in: Brantford, Ontario, Canada.

I completed my training/education at: Growing up, my family taught me to maintain the property we lived on. This included trimming and removing trees, as well as general landscaping practices. I have always been a

This is the format of our career profiles using https://letstalkscience.ca/careers/heather-dover as an example.

Heather Dover

Arborist

When I was a student, I enjoyed:

When I was a student, I would have described myself as someone who:

- Always wanted to be outside
- Liked helping people
- Liked being given specific instructions
- ∠ Liked reading
- Was really creative

How I affect people's lives

Profiles show cultural diversity

ZINEB AHNOU GHOUILA - DIRECTRICE SOLUTIONS D'AFFAIRES NATIONALES CHEZ UNI-SELECT CANADA

We are working towards equal French content. Our focus to increase Indigenous representation continues.

Profiles show **sector diversity**

Our profiles showcase the connections of STEM to art, language, human services, skilled trades, and more. Many careers profiled are ones that youth may not have realized exist... and you can't prepare for something you don't know exists.

Professional Learning Audiences Career Teachers and Guidance Counsellors

Aligned with the general topics of career programs across Canada. One or more lesson plans developed for the following topics:

- Introduction to Career Development
- Employability Skills
- Essential Skills
- Career Adaptability

- Personal Management & Planning
- Life Style & Aspirations
- Career Preparations
- Occupational Clusters

Grade: 7, 8, 9, 10, 11, 12

Lesson Format

Students will further develop their understanding and appreciation of the importance of personal interests, skills, achievem experiences to the career development process.

Setting the Stage

Students will understand that certain jobs require specialized skills and education. Often they don't realize how personal sk experiences open employment doors, create opportunities for advancement, and ultimately lead to a fulfilling work life.

Classroom Teacher Audience

- Fewer teacher resources/development stage
- Mainly developing "virtual career fairs" for use in subject teachers' classroom
- Goal is to help students recognize that the stuff they do in the classroom can link to careers
- Subject teachers have role to play in informing students about career options and possibilities
- Teachers are less likely to know of careers in sectors that are outside academia

Virtual Career Fairs for the Visual Arts Classroom

Summary

- Students will learn about careers, and career pathways, through their review of various career profiles.
- Students will relate topics being studied in the visual arts classroom with applications in the workplace.
- Students will recognize that skills developed in the study of visual arts are applicable and valued in the workplace.

Setting the Stage

Students often have a very narrow view of the types of careers available to them. The types of careers/jobs in which they see adults engaged informs their view. This information may come from TV shows, movies or real life experience with working adults (e.g., a visit to the dentist, a contractor hired to do work at their home, what their parents do). The less exposure young people have to the world of work, and workers in general, the more limited their view will be. To ensure students have the broadest perspective on careers available to them, they should be exposed to as many potential careers as possible.

One way for young people to become aware of the variety of occupations available in the world of work is by direct interaction with individuals who work in different occupations or careers. Teachers can ensure that students have such contact is by inviting people to visit the class to talk about their careeral preparation. Another method is to have students engage in job shadowing, work volunteering, or co-op placements. Or we can organize, and have students attend, a career fair where students can speak to people in careers that interest them and ask specific questions about those careers. Where attending a career fair is not possible, students can participate in a virtual career fair, which uses online information about people engaged in various careers.

Preparation

· Arrange for computer and internet access for students working individually or in groups.

What to Do

Identify and select the individual profiles you wish to include. These can be organized by career sector (e.g., health care, information technology, skilled trades), educational pathway (e.g., college, apprenticeship, university), by students school subject interest (e.g., visual arts, biology, home economics), or it can be a mix of sectors/interests.

A sample collection of career profiles, in which a visual arts background is required or beneficial, is available below. As they read each profile, students get to "meet" individuals who work in careers that use a visual arts knowledge.

Name & Career	Link
Tegan Mierle, Product Designer	https://letstalkscience.ca/careers/tegan-mierle
Jeremy Friedberg, Sponge Lab Interactive	https://letstalkscience.ca/careers/jeremy-friedberg
Shelly Sandiford, Siconic Science Media	https://letstalkscience.ca/careers/shelley-sandiford
Maya Bankovic, Cinematographer	https://letstalkscience.ca/careers/maya-bankovic
Maxyme Paiement, Team Lead – TFO	https://letstalkscience.ca/careers/maxyme-max-paiement
Kaylyn Roloson, Metal Fabricator	https://letstalkscience.ca/careers/kaylyn-roloson
Dino Pulera, Medical Illustrator	https://letstalkscience.ca/careers/dino-pulera
Rebecca Pilon, Background Artist	https://letstalkscience.ca/careers/rebecca-pilon
Graham Qually, President – Liquid Entertainment	https://letstalkscience.ca/careers/graham-qually

Individually, or in pairs, students could view the profiles provided. From the profiles provide, each student could select the career they found most interesting.

Teachers could use the following questions for think-pair-share activities or to stimulate whole class discussion.

- Did any of these "Visual Arts" careers surprise you? Did it challenge your definition of "visual arts career"? Explain.
- Explain.
- Which career did you find the most interesting? Could you see yourself doing this type of work?
- 4. Without considering salary, what would be the features of your ideal career
- 5. Which career interested you the most? What other high school subjects would be necessary to get into this career?
- Do you think there are personality traits associated with visual arts careers? Do you see these traits in any of the individuals in these profiles? Explain.

Teachers could use the Virtual Career Fair Assignment sheet to structure students' thinking and reflection on the profiles they read. (see below)

Assessment

- Teachers could observe and make anecdotal notes while students are engaged in discussions.
- Student responses on the Virtual Career Fair Assignment could be collected and individual feedback provided.

A Virtual Visit with Some Health Sample of printable student handout sheet of virtual career fair for the health science sector.

Name:	Date:	Class:	

Introduction

In this assignment, you will participate in a Virtual Career Fair using a collection of online career profiles of people who work in a variety of healthcare careers. Using the information from these profiles, complete the assignment

Procedure

Read or view each of the profiles assigned to you or select five (5) profiles in career areas about which you would like to learn more. Make notes, summaries, etc., just as if you were in-person at a career fair. Use the information you collect to answer the questions that follow.

Career Profiles in Health Sciences Sector

David Charest - Director, Sector Dean Simon - Registered Dietitian Deena Al-Saad - Tissue Coordinator Jennifer Gardy - Senior Scientist at the BC Centre for Disease Control Kathy Deuchars - Ontario Genomics Kelly White - Registered Massage Therapist Kona Williams - Forensic Pathologist

Rachel Gardiner - Optometrist Samantha Stuart - Quality Engineering Intern, Synaptive Medical Simon Cooke - Physiotherapist Spencer Turbitt - CEO & Director of iApotheca Healthcare Inc. Stephanie MacDonald - Organ and Tissue Donation Coordinator

Questions/Activities

- List the names of the profiles you reviewed.
- 2. Which one of the careers, in the group provided, was most interesting to you? Explain why.

Use this career profile to answer the following questions.

- What did you learn about this career? What surprised you about this career? Explain.
- 4. What transferrable skills do you think are necessary to be successful in this career? What jobspecific skills would be required?
- 5. Do you think you would enjoy working in a career like this? Why/why not? (consider the "typical
- What do you think would be the most exciting aspects of this career? Explain.
- What do you think are the most challenging aspects about this career? Explain your thinking.
- What personality traits do you have that are a good fit for this career? Which are not such a good
- What specific high school courses and activities would help someone prepare for this career?
- 10. What other questions do you still have about this career?

letstalkscience.ca | parlonssciences.ca

11. Where can you look to find more information about this career?

Virtual Career Fairs for the Science Sample collection of careers related to main areas of science (Biology, Chemistry, Physics, Earth Science)

	Chemistry	Earth Science
•	Emily Stencel - Beauty Entrepreneur	 Heather Orr – Project Manager
	Clair Bartman - Quality Analyst	 Joel Shank – Geoscientist
