Creating Connections

Creating new ideas by combining seemingly unrelated ones to generate something new.

doubleknot.works

Creating connections

- **Client centered approach**
Job search, career exploration, interventions, etc.
- **Organizational perspective**
Office space, team development, systems, etc.
- **Personal growth**
Career, goal setting, future-focused planning, etc.
- **What else?**

Us here today!

- We're going to try it today in real life
- Super condensed!
- Pausing to dig into some spots
- Speeding up and skipping others
- Drawing connections
- Using "How might we" notes

MONDAY

Lettering by Jonathan Ball @balloftheabove

Default

Perfectly plan everything

Sprint

Focus on one key moment

doubleknot.works

Understand the problem

The first point of contact with a client does not inspire engagement

doubleknot.works

Define the challenge

Define the challenge

- Long term goal
- Map the challenge
- Start at the end
- Ask the experts
- Pick a target

doubleknot.works

Sketch

Lettering by Jonathan Ball @balloftheabove

Default

Group
brainstorm

Sprint

Work alone,
together

doubleknot.works

Explore the problem space

Explore the problem space

- Search for existing ideas
- What could you remix and improve?
- What have you heard of others doing?
- Where have you seen this done well in other industries?

doubleknot.works

Crazy eights fours

- Fold your paper into 4 rectangles. Sketch 1 idea in each rectangle, rather than a storyboard.
- Go for quantity, not quality. Don't worry about making these beautiful.
- Try to get beyond your initial idea.
- ~~8 ideas in 8 minutes~~
- 4 ideas in 2 minutes!

doubleknot.works

Crazy eights fours AGAIN

- Fold your paper into 4 rectangles. Sketch 1 idea in each rectangle, rather than a storyboard.
- Go for quantity, not quality. Don't worry about making these beautiful.

Decide

Wednesday

Lettering by Jonathan Ball @ballsoftheabove

Default

Endless
discussion

Sprint

Fast and
decisive

doubleknot.works

Identify the best solutions

Identify the best solutions

In silence...

- Put your crazy four drawings in the middle of the table.
- Each person gets 3 stickers. Use them to vote silently for the components you like best.
- Yes, you can vote for your own, and yes you can vote multiple times for the same thing!

doubleknot.works

Identify the best solutions

As a table...

- Take the winning scenes from your sketches and combine them into a storyboard.
- Whether it's mapping, charts, or sketches, create a step-by-step plan for your prototype.
- Choose one representative to share to the big group (but not just yet).

doubleknot.works

Prototype

Thursday

Lettering by Jonathan Ball @balloftheabove

Default

Build minimum viable products (MVP)

Sprint

Fake it

doubleknot.works

Prototyping

Prototyping

- “Fake it till you make it” philosophy
- Building a realistic façade
- Just enough to learn, but not more
- Aiming for the best possible data from testing
- Learning whether we're on the right track

doubleknot.works

Prototyping

Test

Lettering by Jonathan Ball @balloftheabove

Default

Wait for
perfect data

Sprint

Quick and dirty
data now

doubleknot.works

Interview and learn

Interview and learn

- How could these ideas be tested?
- Watch together, learn together
- Looking for patterns
- Efficient failure / flawed success
- How far do we have to go?
- What should we do next?

doubleknot.works

Reflection

What was valuable?

How could these processes amplify what you're already doing?

*How did it feel to work creatively in this way?
(easy / challenges)*

What would you adapt to work for you?
